WHERE: IN FRESNO COUNTY, ON STATE ROUTE 269 WITHIN THE CITY OF HURON FROM JAYNE AVENUE TO STATE ROUTE 198

The California Department of Transportation (Caltrans) announces that State Route 269 Slurry Seal Pavement Rehabilitation Project will begin next week. One-way reversing lane control operations begin on Monday morning at 6:00 a.m. in order to implement roadway sealing within the construction limits.

Construction of this project will continue from 6:00 a.m. until 6:00 p.m., Monday through Thursday and continue Friday morning until noon. Reversing lane control operations on State Route 269 will be in place during construction. The public will experience delays within the project limits during this time frame.

The purpose of this project is to improve the existing roadway by providing motorists with a smooth roadway surface. This project, which includes re-striping operations, is anticipated to be completed in June 2008.

Caltrans would like to thank the residents, businesses and commuters for their patience during this improvement project. The public is reminded to drive with extra care while travelling through this construction project and to adhere to all construction signage. Please merge when directed to do so, be alert to construction personnel and please ***"Slow for the Cone Zone."***

For further information regarding this project, contact the Public Information Office at the numbers listed above.
